

# GET LANDA TOUGH ON HYGIENE

Today cleaning is more important than ever! With heightened awareness of contamination from surfaces – and each other – businesses need to be vigorous in their cleaning efforts. It's imperative to thoroughly clean surfaces prior to disinfecting to first remove soils and organic matter. Why? Soils can harbor germs and bacteria; disinfection becomes less effective if surface soils are present. Landa can provide solutions to help.

## Hot Water Pressure Washers

Hot water speeds cleaning compared to cold water cleaning. In addition using temperatures of at least 185°F can effectively combat germs, bacteria and viruses. Inquire about possible steam options.

## Pressure Washer Detergents

Hot water pressure washing is more effective with the use of a chemical agent. We offer a general purpose cleaner safe for a broad range of surfaces which can be used before disinfecting.

## Steamers

Professional steam cleaners are ideal for sanitizing as they can impressively remove up to 99.999% of bacteria without the use of chemicals. Our environmentally-friendly steamers clean flat surfaces and are easy-to use.

## Floor Scrubbers

Wet scrubbing in one step with immediate absorption of dirty water, allows for larger areas to be cleaned in a shorter time. Walk behind or ride-on models depending on the area you're cleaning.

## Window Vac & Surface Cleaner

Clean high touch points such as glass entry doors and counters with this window and surface vacuum cleaner. Eliminates fingerprints from smooth surfaces with streak-free clean.

## Mister & Vital Oxide®

A hospital-grade misting system specifically designed for use with Vital Oxide®, an EPA registered disinfectant proven to kill 99.999% of bacteria. More efficient than hand-wiping surfaces, as an even coating is applied to all surfaces.
