

LANDA[®]

GET LANDA TOUGH ON HYGIENE

Opening schools is a sensitive topic, and parents need to know their children are safe. What can the education system do to protect students? They must clean and disinfect surfaces constantly. This is a daunting task, but it is made easier when you have the right tools.

Protecting students and teachers from coronavirus is a top priority for the education system. Applying disinfectant in a school can be an overwhelming task when the sheer volume of surfaces is considered. However, with the right tools it's manageable.

KEEPING STUDENTS SAFE IS MADE EASIER WITH THE RIGHT TOOLS.

The Kärcher PS 4/7 Bp Mister is the ideal product to quickly disinfect surfaces. Misting is more effective than spray wipe methods, as it envelopes surfaces, delivering disinfectant into the hard to reach corners and crevices which wipe methods can't reach.

The PS 4/7 mister is specifically designed for use with Vital Oxide® disinfectant, which is listed on the EPA List N: Disinfectants for use against SARS-COV-2, the cause of COVID-19. It kills 99.999% of bacteria in less than 60 seconds, including eColi, Salmonella, and Listeria. It's odorless and requires no rinsing.

Vital Oxide® is available in the following sizes. Ask about our convenient delivery on larger sizes.

FOR USE AGAINST SARS-CoV-2 (COVID-19)

Vital Oxide® Product Information

Part No.	Description
8.639-558.0	Vital Oxide - 4x1 gal
8.639-560.0	Vital Oxide - 6x1 qts
